

Multimodal Learning

unleashing the human memory

[Dave Cohen](#), Oct 2023

Why this talk?

Question: what should people learn in an age of chatgpt?

What we'll explore

The state of learning today, how we got stuck on a narrow way of learning (text)

How multimodal memory techniques can broaden how we learn; make it more fun and efficient

My story

How I'm Building My Second Brain

```
// big .md notes collection

[[all-about-x2]]
```

Rote learning takes up to **160 repetitions**

~[Rote Memorization and Alternatives to Learn Faster and More - A Tutor](#)

A picture is worth **1000** words

50% of our brains are visual

Ars Memoriae

2500 year old memory techniques

So, why is text the default?

Text is the end result

Thinking benefits from going beyond text

Imaginative powers - senses, faces, time, spaces

b. 2005

Code

Method of Loci - Walking through a *memory palace*

Choosing memory palaces

Places you're very familiar with:
Childhood home(s)

Places you associate with learning:
School
★ Coding bootcamp

Street routes
Famous places
Fictitious places
...should have interesting spatial qualities for easy recall

Final thoughts

Learning this way is fun, engaging, and motivating.

It's personalized and creative, not just text on a page or screen.

You'll learn more, faster:

- you'll use more of your brain (>50%)
- less time re-reading (160x faster)
- 1 picture, 1000 words (1000x more efficient)

Thank you 🙏

Integration

“Whenever you learn something new it's very important that you spend time integrating it with what you already know.”

~Claus Levin, the Wizard of Shred [Integrating Sweep Picking With Other Techniques](#)

Imaginative powers - using the mind's eye/ear/etc.

The "pseudo-reality in one's imagination can be so convincing that it can have unexpected effects on the physical body."

~Marisa Brook, [The Science of Mental Fitness](#)

-  Increasing skills (music, etc)
-  Building muscle
-  Pain management
-  Relaxation
